

CL3300 Series

Cylindrical Lockset Parts Manual

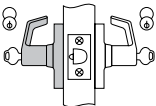

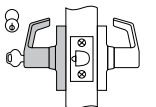

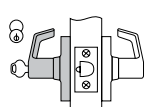

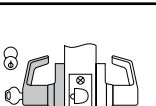

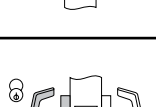

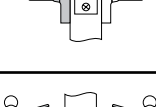

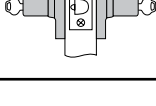

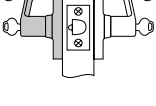

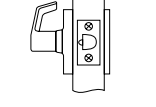

Outside/Inside	Series/ Function	Type	ANSI No Series 4000.	Function Description	Page
	CL3310	Passage or Closet	F75	- Latchbolt by lever either side. - Both levers always free.	8
	CL3320	Privacy, Bedroom or Bathroom	F76	- Throw-off latchbolt by lever. - Outside lever locked by push button. (Lever handle is freewheeling in locked position.) - Outside lever unlocked by emergency release tool outside, by rotating inside lever or by closing door. - Inside lever always free.	10
	CL3320H	Hospital Privacy		- Outside lever locked by push button. (Lever handle is freewheeling in locked position.) - Outside lever unlocked by simultaneously depressing outside pushbutton while rotating lever. - Rotating inside lever or closing door also unlocks outside lever. - Outside lever handle is freewheeling when locked.	10
	CL3320TO	Time Out Lock		- Latchbolt by lever either side (passage) unless push button depressed and held by caretaker (detention side becomes freewheeling). Lock returns to passage mode upon release of push button. - Push button automatically releases when caretaker releases push button. - Both levers always free.	12
	CL3329	Hotel or Motel	F93	- Throw-off latchbolt by lever inside or by key outside. - Push button shuts out all keys except emergency key, and projects occupancy indicator in face of cylinder. (Lever handle is freewheeling in locked position.) - Push button released by turning inside lever or by closing door.* - Outside lever always locked. - Inside lever always free. - Not available with other manufacturers keyways.	14
	CL3332	Institutional or Utility	F87	- Deadlocking latchbolt by key either side. (Lever handles are freewheeling in locked position.) - Should be used only in office or room with multiple entries.	16
	CL3340	Patio or Privacy	F77	- Throw-off latchbolt by lever. - Outside lever locked by push button. (Lever handle is freewheeling in locked position.) - Inside lever always free. - Should not be used in rooms that have no other entrance.	18
	CL3340NT	Exit Latch	F89	- Deadlocking latchbolt by lever inside. - Outside lever always locked. (Lever handle is freewheeling in locked position.) - Inside lever always free.	20
	CL3351	Entrance or Office	F109	- Deadlocking latchbolt by lever either side, except when turn button locks outside lever. Pushing turn button in locks outside lever, requiring use of key outside to unlock. (Lever handle is freewheeling in locked position.) - Turning inside lever unlocks outside lever. - Pushing in and turning button locks outside lever, requiring key at all times. Turning inside lever does not unlock outside lever until button is manually turned to unlocked position. - Inside lever always free.	22

 Indicates optional interchangeable core available.

 Indicates freewheeling lever in locked position.

*Unless push button has been fixed in locked position by spanner key (furnished). When push button is fixed by spanner key, lock is operable only by emergency key or by display key.

BPS Power Supply

Power supplies are designed to provide reliable filtered and regulated power for long life to a variety of electrified hardware components. All modular power supplies are voltage specific and are designed to meet UL 1481 Standards.

Features

- Fire panel emergency release input
- PC Board mounted system LED indicator
- Voltage specific 12 or 24VDC
- Regulated and filtered with input and output protection
- Battery charging is provided from a separate output terminal

Model	Input	Output
BPS-12-1	115VAC @ 50/60 Hz	1 Amp @ 12VDC
BPS-12-3		3 Amp @ 12VDC
BPS-24-1	115VAC @ 50/60 Hz	1 Amp @ 24VDC
BPS-24-2		2 Amp @ 24VDC

Grade I Key-In-Lever Cylindrical Lockset CL3300 Series

IMPORTANT: The accuracy of the door preparation is critical for the proper functioning and security of this lever handle lock. Misalignment can cause premature wear and a lessening of security.

***Standard Installation for 1-3/4" doors.**
See page 2 to adjust for other door thickness.

- A** Install Latchbolt → ① → ②
- B** Install Lockbody → ③
- C** Install Inside Trim

Fax: 800-659-7293

In Canada: ASSA ABLOY Door
Security Solutions Canada
160 Four Valley Drive
Vaughan, Ontario, Canada L4K 4T9
www.assaabloy.ca

TEST OPERATION: Rotate levers to see that latch bolt moves freely.
DO NOT FORCE.

If lockset does not operate properly, remove lockset from door and check door preparation.

Door & Frame Preparation

Mark door

Locate and mark horizontal center line at desired height above floor. Fold template over edge of door, centering on horizontal line. Mark centers of holes at proper backset. Mark both sides of the door.

Note:

Be sure to verify backset before marking & drilling door.

Drill door

A. 2-1/8" (54mm) hole thru door. Cut ANSI tab notches as shown on template (except CL3350 and CL3370).

B. Drill 1" (25mm) hole in edge of door. Cut out for latch front 5/32" (4mm) deep. 1-1/8" (29mm) wide x 2-1/4" (57mm) high. Check latch unit for proper width front and square or round corners (except CL3350 and CL3370).

C. Drill two (2) 11/32" (8mm) Dia. holes through door for all functions.

Caution:

To avoid splintering wood doors, drill holes from both sides.

Install Strike

Adjust Lock for Door Thickness

Adjust lock to door thickness if other than 1-3/4" (44mm) doors*. (Lock pre-set from factory for 1-3/4" door).

- Remove outside lever (see page 4)
- Slide off outside cassette assembly.
- Rotate rose liner to adjust lock to fit door thickness, so that the distance (Dim. "A") from the inside of the liner to the centerline of the retractor is one half of the thickness of the door (see chart).
- Re-assemble outside cassette assembly onto chassis assembly (except CL3380 and CL3381 functions).

* Note: For doors more than 2", verify lock package is labeled with "D214" option.

Door Thickness*	"A"
1-3/4"	7/8"
2"	1"
2-1/4"	1-1/8"

Cylinder Installation

To Install Interchangeable Core (with lever already installed on lock)

A. Install Tailpiece

- B. Insert key marked CONTROL and turn clockwise approximately 15 degrees. See Figure 2.

- C. Insert core into lever and return key to its original horizontal position locking core in place. See Figure 3.

- D. Withdraw key. Test lockset for correct function with operating key.

- E. Control key has no further use in lockset installation and must be safeguarded for return to Security personnel when installation is complete.

Figure 3

CL3355 Classroom Function Timing

Before installing cylinder:

- Turn Cam so points are up and down, 6 o'clock and 12 o'clock (See Below)

After installing cylinder, test operation:

- Key should rotate 180° both ways
- If cylinder rotates 360°, remove cylinder and check cam orientation.

To Remove Interchangeable Core

- A. Insert key marked CONTROL and turn clockwise approximately 15 degrees. See Figure 4.
- B. Pull core and tailpiece completely out of lever.

Figure 4

Install Standard Cylinder

Make sure lock is unlocked.

- A. Make sure cylinder tailpiece is aligned in same direction as cylinder bible. Slide cylinder all the way into lever.

- For 6-pin cylinder:** Fold retainer at hinge and press fit retainer halves together as shown.
- For 7-pin cylinder:** Break retainer at hinge and discard spacer section. Also remove black cylinder spacer from inside of chassis rollback for clearance.

Standard Cylinder Tailpieces

Dimensions are given in inches (mm).

Corbin Russwin conversion kit for Schlage® cylinders with CL3300 lockset.

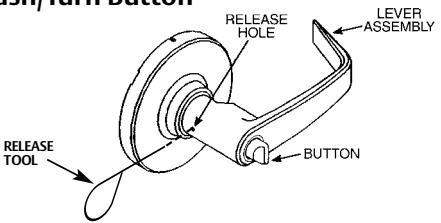

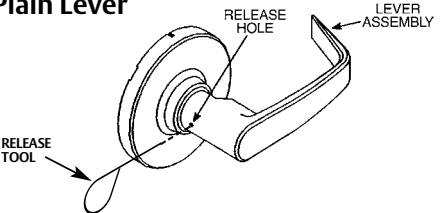

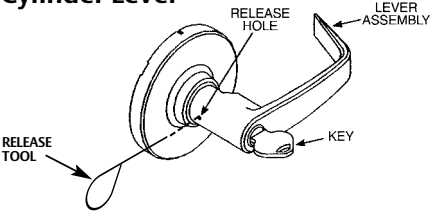

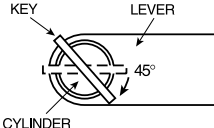

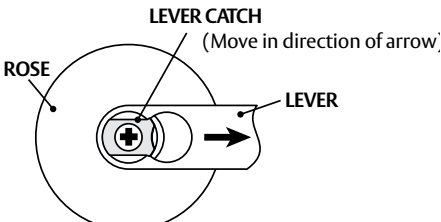

1. Remove threaded collar and Schlage® tailpiece.

2. Install CL3300 tailpiece with threaded collar. (adjust collar for proper end play of plug.)

Optional Installation

For CL3380 & CL3381 Function Only.

For CL3390 & CL3391 Function Only.

ASSA ABLOY, the global leader
in door opening solutions

ElectroLynx® Connector System

For ASSA ABLOY Group Doors and Hinges with ElectroLynx® Connector System

- Plug 8-pin lock connector into 8-pin door connector (4-pin door connector not used for this application).

For non *ElectroLynx* Connector System, door install available retrofit harness and use with *ElectroLynx* hinge. Follow installation instructions for *ElectroLynx* Connector System.

For non *ElectroLynx* Connector System door and hinge, remove connector on lock (warranty void if rectifier module is removed). Use proper crimp splices or wire nuts in accordance with local code for terminating connections. No polarity of wires is required.

- Install lock per instruction sheet provided
- Plug 8-pin door connector into 8-pin hinge connector (4-pin door connector not used for this application).

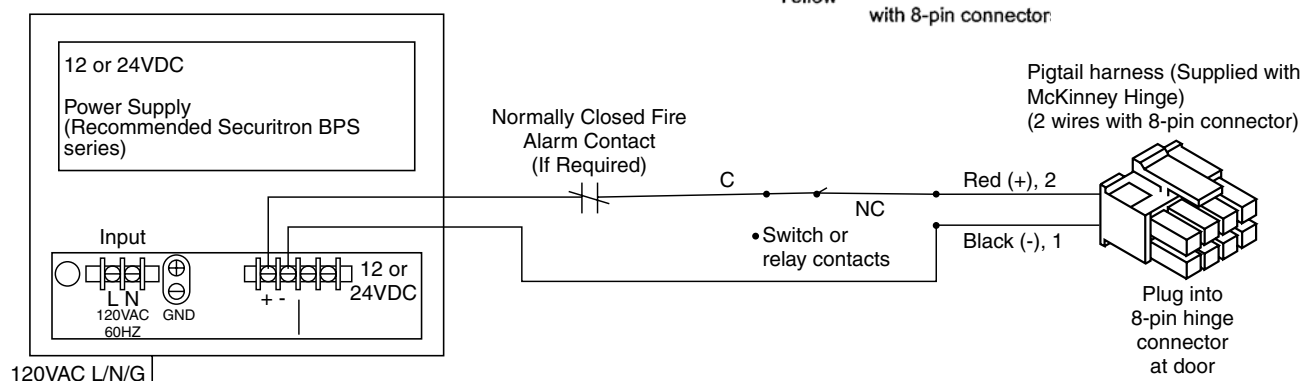

Use template T30971 for door preparation

- Electrical Specifications
24 Volts AC/DC +/-10%
Operating Current .150 AMP

12 Volts AC/DC +/- 10%
Operating current .250 AMP

- Wire hinge to power source

Hardwiring Made Easy®

ElectroLynx®

As part of their promise to provide innovative, fast and effective high security solutions to their customers, ASSA ABLOY Group companies offer ElectroLynx®, a universal quick-connect system that simplifies the electrification of the door opening.
